

Associate: Angus Warren

Angus Warren has strong strategy, commercial and business expertise which has been applied in the upstream, midstream and downstream sectors of the international oil & gas industry. This experience was gained on international consulting projects and during his 15 years with BP working on assignments that included gas exploration and production assets in the UK North sea, mid-stream oil pipeline and refining in the U.K., plus leading the commercial effort for BP's involvement in the Angola LNG Project.

Since 2005 Angus has operated as a management consultant specializing in strategy formulation and implementation; negotiations and relationship building; joint ventures; business planning; and international business for the oil & gas sector. Typical recent engagements have included developing a pipeline operations outsourcing strategy for a major Latin American national company; creating a new resource exploitation and internationalization strategy for a national oil company (NOC); conducting a Gulf of Mexico pipeline study for an international oil company (IOC); preparing a screening study of potential target assets in Argentina for a mid sized U.S. independent seeking to invest in the region; and working with members of the Energy Ministry of Equatorial Guinea.

Angus holds a BEng (Hons) in Chemical Engineering, a MSc in Technology and Management in the Oil & Gas Industry and an MBA from the University of Texas at Austin. He is a Member of the Institute of Chemical Engineers and the UK Energy Institute.
